Graduate Student in Linguistics

University of California, Santa Barbara

Hieber, Daniel W. 2013. Linguistics in industry. Talk presented to the UC Santa Barbara Linguistics Club, Nov. 12, 2013, Santa Barbara, CA.

The Endangered Language Program Mission

The Endangered Language Program works with Native language communities to create custom Rosetta Stone software for use in their language revitalization programs. Through a variety of development models designed to make Rosetta Stone software available to a wide range of indigenous groups, we promote global linguistic diversity and embody Rosetta Stone's belief that language learning makes the world a better place.

Endangered Language Program Timeline

- 1999: First project launched
- 2004: Endangered Language Program founded
